

TRECODER[®] Spot Gun

The TRECODER[®] Spot Gun is a must for the forester, logger and lumberman - anyone involved in tree marking operations.

- 20% more output per stroke
- Stronger, reinforced trigger with "4 finger" trigger action. One squeeze and you've made your mark.
- High impact plastic handle for durability and long life
- Larger grip for easier handling and carrying
- Improved thread design grips handle more securely to ink container
- Heavier gasket reduces leakage into handle
- Durable corrosion-resistant brass barrel
- .015 mesh screen located at bottom of foot valve prevents solids from clogging gun nozzle

Use of Water Based Tree Marking Ink in the TRECODER[®] Spot Gun

ACMI **TRECODER Spot Guns** are now manufactured with parts that should be able to withstand use with water based tree marking paints. When using a water based tree marking paint in the **TRECODER Spot Gun** it is necessary to clean the Spot Gun with an appropriate cleaner, immediately after each use. If the paint is allowed to dry in the Spot Gun, it will be difficult, if not impossible, to clean.

ACMI is currently testing a new water based **TRECODER** which we hope to be able to offer in the near future.
